VOLUME 33 NOS. 1/4 SPECIAL ISSUE

FLOTATION OF SULPHIDE MINERALS 1990

edited by
K.E. Eric Forssberg
Division of Mineral Processing, Luleå University of Technology, S-951 87, Luleå, Sweden

CONTENTS

Preface
K.S.E. Forssberg (Luleå, Sweden) ix
Flotation of chalcopyrite, pentlandite, pyrrhotite ores
G.E. Agar (Mississauga, Ont., Canada) 1
Pulp chemistry in sulphide mineral flotation
G. Berglund (Luleå, Sweden) 21
The electrochemical and flotation behavior of chalcocite and mixed oxide/sulfide ores
J.S. Hanson and D.W. Fuerstenau (Berkeley, CA, USA) 33
FTIR analysis of sulphide mineral surfaces before and after collection: galena
J.M. Cases and P. de Donato (Vandoeuvre Cedex, France) 49
Reactions on sulfide mineral surfaces in connection with xanthate flotation studied by diffuse reflectance FTIR spectroscopy, atomic absorption spectrophotometry and calorimetry
I. Persson, P. Persson, M. Valli, S. Fözö and B. Malmensten (Uppsala, Sweden) 67
Surface reactions in aqueous metal sulfide systems. 1. Fundamental surface reactions of hydrous PbS and ZnS
Z.X. Sun, W. Forsling (Luleå, Sweden), L. Rönngren and S. Sjöberg (Umeå, Sweden) 83
Studies of the effect of antimony impurity on the flotation behaviour of galena
K. Laajalehto, E. Suoninen (Turku, Finland) and S. Heimala (Pori, Finland) 95
Effect of Fe-lattice ions on adsorption, electrokinetic, calorimetric and flotation properties of sphalerite
B. Gigowski, A. Vogg, K. Wierer and B. Dobias (Regensburg, Germany) 103
Electrochemistry of sulfide flotation: Growth characteristics of surface coatings and their properties, with special reference to chalcopyrite and pyrite
S. Chander (University Park, PA, USA) 121
Anodic polarization of galena in relation to flotation
E. Ahlberg and A. Elfström Broo (Göteborg, Sweden) 135
Some photoelectrochemical insights into galena flotation
S. Fletcher and M.D. Horne (Port Melbourne, Vic., Australia) 145
Dielectric study of activation and deactivation of malachite by sulfide ions
J. Bessière, A. El Housni (Vandoeuvre-lès-Nancy, France) and J.J. Prédali (Trappes, France) 165
Correlation between physico-chemical parameters and results in a flotation plant of sulphides: A new approach for the control of the process
J.L. Cecile and J. Villeneuve (Orléans Cedex, France) 185
Some recent developments in the measurement and control of xanthate, perxanthate, sulphide, and redox potential in flotation
M.H. Jones (Port Melbourne, Vic., Australia) 193
Computer-assisted calculations of chemical equilibria with relevance to the chromate depression of galena
B.I. Pålsson (Luleå, Sweden) 207

Surface reactions in aqueous metal sulfide systems. 1. Fundamental surface reactions of hydrous PbS and ZnS
Z.X. Sun, W. Forsling (Luleå, Sweden), L. Rönngren and S. Sjöberg (Umeå, Sweden) 83
Studies of the effect of antimony impurity on the flotation behaviour of galena
K. Laajalehto, E. Suoninen (Turku, Finland) and S. Heimala (Pori, Finland) 95
Effect of Fe-lattice ions on adsorption, electrokinetic, calorimetric and flotation properties of sphalerite
B. Gigowski, A. Vogg, K. Wierer and B. Dobias (Regensburg, Germany) 103
Electrochemistry of sulfide flotation: Growth characteristics of surface coatings and their properties, with special reference to chalcopyrite and pyrite
S. Chander (University Park, PA, USA) 121
Anodic polarization of galena in relation to flotation
E. Ahlberg and A. Elfström Broo (Göteborg, Sweden) 135
Some photoelectrochemical insights into galena flotation
S. Fletcher and M.D. Horne (Port Melbourne, Vic., Australia) 145
Dielectric study of activation and deactivation of malachite by sulfide ions
J. Bessière, A. El Housni (Vandoeuvre-lès-Nancy, France) and J.J. Prédali (Trappes, France) 165
Correlation between physico-chemical parameters and results in a flotation plant of sulphides: A new approach for the control of the process
J.L. Cecile and J. Villeneuve (Orléans Cedex, France) 185
Some recent developments in the measurement and control of xanthate, perxanthate, sulphide, and redox potential in flotation
M.H. Jones (Port Melbourne, Vic., Australia) 193
Computer-assisted calculations of chemical equilibria with relevance to the chromate depression of galena
B.I. Pålsson (Luleå, Sweden) 207

Polysaccharides in flotation of sulphides. Part I. Adsorption of polysaccharides onto mineral surfaces
J.S. Laskowski, Q. Liu (Vancouver, BC, Canada) and N.J. Bolin (Boliden, Sweden) 223
Polysaccharides in flotation of sulphides. Part II. Copper/lead separation with dextrin and sodium hydroxide
N.J. Bolin (Boliden, Sweden) and J.S. Laskowski (Vancouver, BC, Canada) 235
Effect of grinding media–chalcopyrite interaction on the self-induced flotation of chalcopyrite
J.H. Ahn and J.E. Gebhardt (Salt Lake City, UT, USA) 243
Possibilities of collectorless flotation in the treatment of pentlandite ores
K. Heiskanen, V. Kirjavainen and H. Laapas (Espoo, Finland) 263
Mechanisms of pyrite flotation with xanthates
X.H. Wang (Lexington, KY, USA) and K.S.E. Forssberg (Luleå, Sweden) 275
New reagents in sulphide mineral flotation
A.M. Marabini, M. Barbaro and V. Alesse (Rome, Italy) 291
The interaction of polyethylene oxide non-ionic surfactant layers adsorbed on hydrophobic minerals
R.J. Pugh (Stockholm, Sweden) 307
The influence of metal hydroxides and collector on the flotation of chalcopyrite
G.D. Senior and W.J. Trahar (Clayton, Vic., Australia) 321
Column flotation: A selected review. Part I
J.A. Finch (Montreal, Que., Canada) and G.S. Dobby (Toronto, Ont., Canada) 343
A flotation column simulator based on hydrodynamic principles
G.H. Luttrell and R.H. Yoon (Blacksburg, VA, USA) 355
Some industrial implications of changing frother chemical structure
R.R. Klimpel and S. Isherwood (Midland, MI, USA) 369
EMDEE Microflot flotability test
M.W. Chudacek (North Ryde, NSW, Australia) 383
